Halton Police Board — Website Redesign Proposal (RFP-01-26)

Proponent: Shashank Bhasin · shashankbhasin21@gmail.com · +91 7972836653

Submission inbox: Jessica.Warren@haltonpoliceboard.ca · Due: 1 October 2026 · Currency: CAD

DO NOT SEND until SOC 2 Type II or ISO 27001 for the bidding entity is attached, Canadian host named, and independent pen-test firm named. Invented certifications void this packet.

1. Understanding

Rebuild the Board public website away from WordPress: up to ~200 pages and ~300 PDFs; integrations for YouTube, Diligent, social accounts, HRPS/LECA/IoP links; WCAG accessibility; Canadian data residency for production, backups, logs, and staging; OWASP ASVS Level 2; independent penetration test; CDN/WAF without foreign proxy loops for Board data; RTO ≤ 4 hours / RPO ≤ 24 hours; CMS for 2–3 staff; fixed five-year CAD pricing including after-hours support; target launch 15 January 2027.

2. Delivery approach

Prime consultant: Shashank Bhasin (IA, design system, CMS build, migration, training, project management, EST morning overlap, after-hours on-call). Named Canadian-region hosting/CDN subcontractor and named independent pen-test firm to be inserted before send; prime remains fully responsible per Q&A.

CMS default candidates: Craft CMS or Statamic on Canada hosting (final pick in discovery). Phases: discovery/IA → design system → CMS+integrations → migration → ASVS L2 + pen test remediations → training and cutover.

3. Security and residency

All HPB data stays in Canada unless expressly authorized. Hosting and CDN/WAF use Canadian regions/edges with documented routing. Pre-go-live independent third-party pen test. ASVS Level 2 before launch. RTO 4h / RPO 24h minimum. Appendix A must contain real SOC 2 Type II or ISO/IEC 27001 evidence for both proponent organization and host — not placeholders.

4. Experience (honest disclosure)

Direct Canadian police-board production builds to date: none. Relevant pipeline work disclosed for transparency: Chickasaw Nation AMP pecan/specialty-crop website proposal on file (fixed USD 16,500, 2026); PolicyWise brand + website proposal received (CAD 98,500, 2026). Additional verifiable case studies to be appended by owner before send. Canada-specific experience preferred per Q&A — not overstated here.

5. Fixed CAD pricing (five-year evaluated total)

Line	CAD
One-time design, build, migrate, train, ASVS prep	62,000
Independent pen test (named firm, pass-through)	4,500
Year 1 hosting + certificates + support (incl. after-hours)	9,600
Year 2 hosting + certificates + support	9,600
Year 3 hosting + certificates + support	9,600
Year 4 hosting + certificates + support	9,600
Year 5 hosting + certificates + support	9,600
Evaluated five-year total	**114,500**

Insurance certificates (CGL ≥ CAD 2M naming Halton Police Board; Tech E&O ≥ CAD 2M) provided on award, not at submission, per Q&A. No bid bonds required.

6. Closing

Jessica Warren confirmed on 30 September 2026 that proposals may be submitted to Jessica.Warren@haltonpoliceboard.ca before 1 October and that remote international vendors may bid subject to Canadian security and data standards. This PDF is submission-ready only after Appendix A certifications and named subcontractors are completed.
